

## EXTENDOSPHERES™ XOL-150 Hollow Spheres

EXTENDOSPHERES™ XOL-150 are white aluminosilicate multicellular hollow spheres. The density of this product is 0.30 g/cc.

In plastic and coating applications, EXTENDOSPHERES™ XOL-150 hollow spheres can significantly reduce composite density. This product is recommended for cultured marble, syntactic foams and other low-shear applications.

EXTENDOSPHERES™ XOL-150 hollow spheres are surface-modified to insure better dispersion, bonding and strength features in adverse environments. On a volume basis, EXTENDOSPHERES™ XOL-150 offers excellent economics when compared to other additives.

### PACKAGING

EXTENDOSPHERES™ XOL-150 hollow spheres are supplied in 20 lb (9.07kg) multi-wall bags, 720 lb (326.53 kg) per pallet from Chattanooga, TN. Samples in sufficient quantity for testing are available upon request.

TYPICAL PROPERTIES OF EXTENDOSPHERES™ XOL-150 HOLLOW SPHERES	
Physical Form	Free-Flowing Powder
Color	White
Average Mean Particle Size XOL-150	35 Microns
Particle Size Range XOL-150	10-150
Bulk Density XOL-150	0.17 g/cc
Density XOL-150	0.30 g/cc
Deformation Temperature	1,300°C
pH (Water Suspension)	7.0

### SAFETY INFORMATION

Prolonged inhalation may irritate the respiratory tract. In dusty areas, the use of a NIOSH-approved mask or respirator is recommended. Material Safety Data Sheets (MSDS) will be supplied upon request.
